Professional Summary

QA Engineering Analyst with 6 years of experience in quality assurance and automation. Skilled in leading QA teams, improving test coverage, and delivering high-quality software. Proficient in SQL, JavaScript, Selenium, Jest, Postman, and Jira. Strong background in TDD, manual and automated testing, and Agile development. Known for troubleshooting, enhancing test processes, and collaborating with engineering teams to drive product quality.

Technical Skills

- Testing Tools: Jira, Postman API, Selenium, Jest, Playwright
- Programming & Query Languages: JavaScript (ES6+), SQL, HTML5, CSS3, Node.js, Express.js, RESTful APIs, GraphQL
- Software Development: SDLC, Agile Methodologies, Test-Driven Development (TDD), OOP, MVC Architecture
- QA & Testing: Regression Testing, Manual Testing, Automated Testing, API Testing, UAT, Test Planning, End-to-End Testing, Functional Testing
- Software & Tools: Microsoft SQL Server, Salesforce Vlocity, Postman, VS Code, GitHub, Render (for deployment)
- Version Control & Deployment: Git, GitHub, Continuous Deployment (CD) on platforms like Render

Work Experience

Companion Protect – Kansas City Metropolitan Area (Remote)

QA Engineering Analyst | October 2023 – Present

- Lead a team of 5 QA engineers, driving continuous improvements in product quality through rigorous testing processes, resulting in fewer bugs reaching production.
- Implemented strategies that balanced the team's workload, optimizing productivity and reducing burnout, while ensuring thorough test coverage across all product areas.
- Promoted cross-platform training within the team, enhancing skill diversity and enabling more flexible testing across different platforms and technologies.
- Refined test plans and strategies, increasing test coverage and clarity, leading to improved product performance and smoother releases.
- Reduced manual testing by approximately 5 hours per sprint by implementing automation, enhancing the team's overall efficiency and freeing up resources for more complex testing tasks.
- Collaborated closely with Product and Engineering teams to design testable user requirements, contributing to the successful implementation of high-impact features and release strategies.
- Monitored QA metrics, focusing on improving test results, reducing leaked defects, and increasing test coverage to ensure higher product quality.
- Mentored junior team members, fostering a culture of continuous learning and process optimization within the QA team.
- Drove QA deliverables for each sprint, ensuring that all testing requirements were met and providing feedback to improve future sprint outcomes.

QA Tester | March 2021 – October 2023

- Wrote and executed test cases using Jira and Xray for software enhancements, contributing to a reduction in production bugs and ensuring high-quality releases.
- Designed and compiled comprehensive test data across multiple environments, increasing testing accuracy and ensuring thorough coverage for complex software updates.
- Actively participated in Agile ceremonies, including daily stand-ups, sprint planning, grooming sessions, and release meetings, fostering seamless collaboration between QA and development teams.

- Identified, documented, and tracked bugs, working closely with developers and product owners to ensure timely resolution and a smoother release process.
- Developed and documented SOPs in Confluence, improving team efficiency and creating standardized processes for test execution and quality assurance.
- Consistently met tight release deadlines by managing test schedules independently, maintaining high standards of quality while delivering results on time.

Technical Support Specialist II | October 2019 – March 2021

- Resolved technical issues for clients, ensuring high levels of customer satisfaction by providing timely, effective solutions.
- Played a key role in process improvements by documenting reproducible software errors and guiding product teams toward faster fixes.
- Created and optimized internal knowledge base content, improving the efficiency of technical support responses and enabling faster issue resolution.
- Trained and mentored team members on troubleshooting techniques, enhancing team knowledge and client support efficiency.

Jackson County Prosecutor's Office – Kansas City, Missouri

Legal Assistant | January 2016 – October 2018

- Managed high-profile case files, ensuring timely preparation of motions, briefs, and discovery, which contributed to successful trial outcomes.
- Liaised with attorneys, police officers, and defendants, maintaining seamless communication and ensuring smooth case management.
- Supported attorneys during trials by preparing audio/visual materials, contributing to more persuasive case presentations.

Plunkett Research Ltd. – Houston, Texas

Customer Account & Service Manager | August 2014 – May 2015

- Strengthened client relationships, resulting in increased customer retention by proactively identifying client needs and delivering tailored solutions.
- Led initiatives that improved account management processes, boosting efficiency in billing administration and client communication.
- Provided product training that enhanced customer engagement and supported internal teams in better understanding product features.

Education

EdX in partnership with the University of Texas – Online

Certificate in Full Stack Application Development | October 2024

Key Skills: HTML, CSS, JavaScript, Node.js, React, MongoDB

University of Houston – Houston, Texas

B.S. in Political Science | June 2015

Graduated Cum Laude | Dean's List

Certifications

- Certified Tester, Foundation Level (CTFL) | ASTQB - ISTQB | July 2022
- CSS Essential Training | LinkedIn Learning | May 2021
- HTML Essential Training | LinkedIn Learning | May 2021
- DAT201x: Querying Data with Transact-SQL | Microsoft Corporation through edX | March 2019

Achievements

- Developed and documented SOPs and QA processes in Confluence, improving onboarding and training efficiency for new QA team members
- Promoted to QA Engineering Analyst in October 2023
